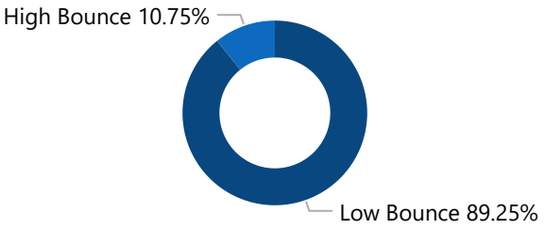
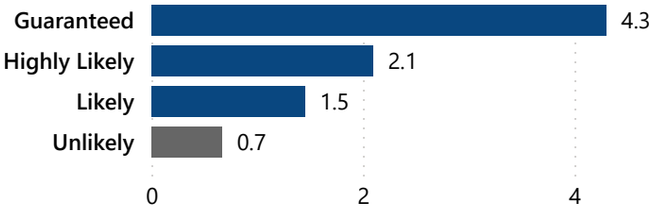
Sessions by Bounce Category

Distribution of Sessions Across Engagement Levels



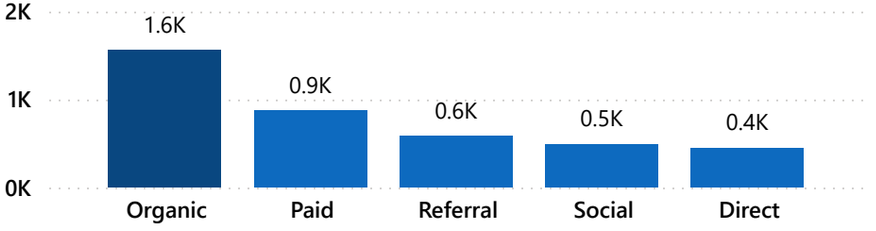
Average time on page by Conversion Status (Mins)

Guaranteed users spend 2x more time than Unlikely users.



Total Previous visits by Traffic Source

Highlights which traffic sources drive repeat engagement.



Insights

1 - Referral shows the highest conversion rate (~98.9%), It also performs strongly across high-intent categories.

2 - User retention is a major strength, The website performs well in bringing users back and converting them.

3 - Guaranteed users spend ~4.3 minutes, Unlikely users spend ~0.7 minutes, Higher engagement directly impacts conversion probability. Improving session engagement could increase conversions.

4 - Overall engagement quality is strong, with most users interacting beyond the landing page.

5 - Organic traffic shows the highest number of previous visits (~1.6K), making SEO a key acquisition strategy.

6 - Average bounce rates across channels range narrowly (~26%–33%), this indicates relatively consistent traffic quality across acquisition channels.

7 - Traffic quality differences are not purely driven by bounce rate, intent and user type play a stronger role.
